Dear Colleagues,

As we head towards the last month of the year, we are happy to share with you a list of all the past issues of PoshanWeeklys from 2021-2022 till date. The list is available [here](#).

We are grateful to the nutrition stakeholders including partners, civil society organisations and academia for their contribution to the PoshanWeekly newsletter through sharing programmatic resources, tools, communication material and latest available evidence on improving maternal and child nutrition round the year. Many thanks to our readers for the encouraging reception and continuous support.

We request you to share this comprehensive list of PoshanWeekly past issues widely with everyone who may find it helpful. Together, we look forward to making nutrition knowledge more accessible for informing and improving programmes and policy decisions towards better nutrition outcomes for every child in India.

Kind Regards,
Arjan De Wagt,
Chief, Nutrition Programme | UNICEF India

Centre for Chronic Disease Control (CCDC) in partnership with **International Food Policy Research Institute (IFPRI), New Delhi** invite applications for a short course on

UNDERSTANDING PUBLIC HEALTH NUTRITION POLICY AND ACTION

12-15 Dec 2022, India International Centre, New Delhi, India

India currently faces multiple simultaneous forms of malnutrition. Optimal nutrition improves cognitive development and school and work performance, reduces morbidity and mortality; all these increase the nation's productivity and economic development.

Traditional training in medicine or nutrition (usually delivered within a home science curriculum) fails to prepare practitioners, researchers or program developers. This short course, offered for the past several years, is a part of their long-term strategy to train a cadre of qualified professionals.

Didactic and interactive sessions are planned over a period of 4 days. Participants will gain increased familiarity with ongoing nutrition programs and policies in India. Participants will learn about the role of nutrition epidemiology in designing evidence-based policy. Using collective experience and expertise of faculty from several leading nutrition and public health institutes, participants will apply these learned principles to promote public nutrition up the political agenda.

Who should apply?

- Representatives from government bodies engaged in policy making or functioning in close association with nutrition and health oriented national programs;
- Research professionals from domains of nutrition, public health and life sciences;
- Faculty members engaged as program practitioners, consultants, technical officers in above fields;
- Future aspirants in nutrition policy /advocacy space may also apply.

A minimum of 2 years' work experience is needed.

Course Convener: Dr Shweta Khandelwal, CCDC shweta@ccdcindia.org

T.H. CHAN

Workshop A Toolkit for Integrating Nutrition into Research

December 15 - 16, 2022

Venue: Lower Parel, Mumbai

Faculty Lead:

Dr Shilpa Bhupathiraju, PhD, MS

Assistant Professor of Nutrition,
Harvard T.H. Chan School of Public Health

This workshop aims to address the gap in the collection and usage of nutritional data within population-based research by exploring various methods and best practices.

Suitable for individuals interested in the use of nutrition data in research, with prior basic knowledge in the area, and a goal of learning how to read and utilize nutrition data appropriately.
